

## **\*IMPORTANT NOTICE\***

Dear Valued Customer,

We want to inform you that several months ago Eagle Disposal installed weight measuring scales on our Frontload trucks. These scales allow us to determine an accurate weight at the time of dumping your container. We have identified that in many of cases we are absorbing disposal costs that are greater than the amount being billed monthly for your service. Please note the following items listed below are **NOT** acceptable in your frontload container.

### **UNACCEPTABLE ITEMS:**

- **Construction Materials such as Concrete, Brick, Asphalt & Dirt**
- **Roofing Materials/Shingles (Large quantities)**
- **Medical and Hazardous Waste**
- **Freon Items**
- **Car Batteries**
- **Tires**
- **Fuel/Oils**
- **Water Softeners Filters (Large quantities)**
- **Animal Manure**
- **Animal Carcasses**

If you are placing any of the above items inside of your container please give our office a call so we can discuss other options that fit your disposal needs. Please ask for Andrea 717-355-9560.

Thank you for your business,

Eagle Disposal
